START ONE

Automatic panel reciprocating spraying machine Easy Use

For small enterprises, for great works

Machine suitable for those companies that need to spray small batches with water based or solvent based paints, or glue for veneered components, or PVC. Also for those companies that for the first time, step into the automatic painting process. START ONE offers higher productivity, paint saving, coating uniformity and higher and constant quality. Touch screen monitor, electronic bar to read pieces sizes. The paper or plastic transport makes the machine self-cleaning. On request, a stain/paint tank is available to place directly on the spraying arm.

- ✓ Fit for medium production volumes and just-in-time
- ✓ Compact machine that requires reduced spaces
- ✓ Large glazing on pressurized booth (on 4 sides)
- ✓ Large filters with double filtering stadium
- ✓ Paper transport, broad autonomy 3000 m
- ✓ One spraying arm, up to 4 guns with quick release device
- ✓ 2-litres tank for small batches
- ✓ High precision reading bar
- ✓ 7" touch screen control panel
- ✓ Available on request with pressurization and infeed and outfeed transport covers
